Ambient Activity Technologies

Ambient Activity Technologies Inc. is Canadian company dedicated to improving dementia care through the design and use of ambient activities, readily accessible in the environment and available for anytime use. By providing non-pharmaceutical, appropriately designed ambient technology interventions to reduce the impact of responsive behaviours, we improve the quality of life and health of individuals living with dementia, as well as reduce care-provider burden placed on LTC staff and family members/visitors.

A NBANH Corporate Member since 2018.
