### **Boehringer Ingelheim (Canada) Ltd**

Since our arrival in Canada in 1972 we have played a varied and integral role in the health of Canadians. We are committed to finding medical breakthroughs and investing in research, development and medicine for therapies which fulfill unmet medical needs. Value through Innovation is the central concept of our corporate vision. While our German parent company stands among the world's 20 largest human pharmaceutical research and development businesses, it has remained a family held company for over a century.

A NBANH Corporate Member since 2018.
